

Shaping the Future
with Green Hydrogen.

On February 17th, 2022, SoCalGas [announced](#) our proposal to develop the [Angeles Link](#), an energy infrastructure system that could deliver reliable green hydrogen to the Los Angeles Basin for use in heavy-duty transportation, industrial processes, electric generation, and other “hard-to-electrify” sectors of the Southern California economy.

Informational Webinars

As part of Phase 1 project activities described in our [Memorandum Account Application](#), and our commitment to a robust stakeholder engagement process, we hosted a webinar on July 20th to provide an overview of the Angeles Link proposal and to share related preliminary research that is available on our [website](#).

In the News

On August 16, President Biden signed the Inflation Reduction Act of 2022 (IRA) into law. The legislation will provide \$369 billion in funding for clean energy and climate. Among other provisions aimed at increasing the production and use of hydrogen, the law includes a hydrogen production tax credit of \$3 a kilogram of green hydrogen. [Read more](#) about the clean energy provisions in the IRA.

Application Progress

Legal briefing has concluded at the California Public Utilities Commission (CPUC) regarding our proposal to establish an Angeles Link Project Memorandum Account for recording incremental costs associated with the stakeholder engagement and engineering, design, and environmental work necessary to develop Angeles Link. The CPUC will develop a proposed decision regarding the establishment of a memorandum account, which is anticipated later this year.
