

Southern California Gas Company (SoCalGas®) will be replacing a section of one of our natural gas transmission pipelines in West Los Angeles with new pipe as part of our Pipeline Safety Enhancement Plan. Pipeline replacement activity involves installing new pipeline parallel to the path of the existing pipeline. Next, the existing pipeline is taken out of service and the natural gas is safely removed from it. Then, the new pipeline section is connected to the distribution system and brought into service. Pipeline replacement is one of the many ways SoCalGas maintains the safety and integrity of our natural gas pipeline system.

### Replacement Details

Location: **Sepulveda Blvd., from South of Wilshire Blvd. to North of Pico Blvd.**

Projected Start Date: **Early January, 2015**

Projected End Date: **Early July, 2015**

Anticipated Duration: **Five to six months**

### What to Expect

The excavation and pipeline installation work will be completed in a series of sections along Sepulveda Boulevard.

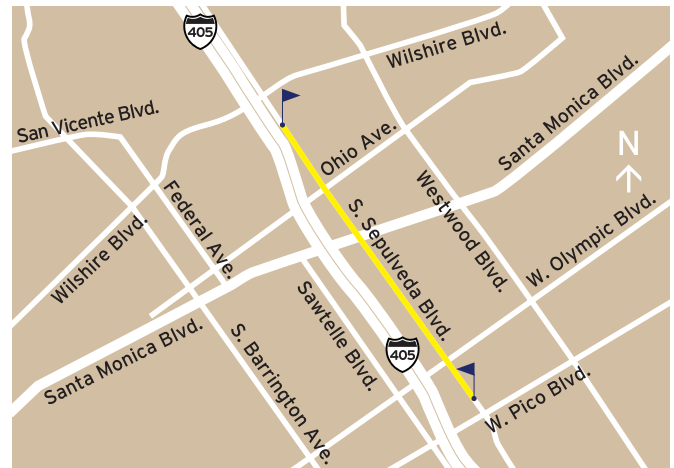

As the work moves along Sepulveda Boulevard, the center left-turn lane and one northbound lane will be closed for the length of the active section, plus a safe distance before and beyond the section. Lane closures on Sepulveda Boulevard will take place during the following times:

- Mon - Fri 9 a.m. to 3:30 p.m. (day work) and 7 p.m. to 5:30 a.m. (night work)
- Saturday 5:30 a.m. to 4:30 a.m. on Sunday (day and night work)
- Sunday No lane closures after 4:30 a.m.

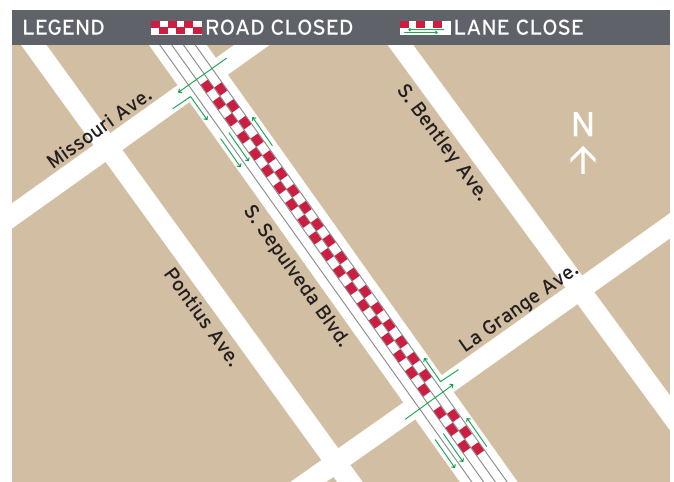

There will be no lane closures on Wilshire Boulevard, Santa Monica Boulevard, Olympic Boulevard, or Pico Boulevard. On-site signage will provide additional traffic details.

People passing by the work site may see an excavation, equipment, and traffic control signage as well as trucks and other vehicles. The nearby community may also hear some work-related noise and notice an occasional natural gas odor. We strive to provide continuous natural gas service for our customers while the replacement activities are taking place. Your gas service should continue without interruption. If that changes, a SoCalGas representative will contact you.

If you have any questions or concerns about the replacement, please call our Customer Contact Center at **1-800-427-2200**. For more information on pipeline replacement, visit **socalgas.com** (search "SAFETY").
