

What is the California Climate Credit?

A Message from the California Public Utilities Commission

This month* your natural gas bill will include a credit of \$73.41 identified as the "California Climate Credit." Your household and millions of others throughout the state will receive this credit on your utility bills.

The California Climate Credit is part of California's efforts to fight climate change. This credit is from the California Cap-and-Trade Program, which requires power plants, fuel providers, and large industrial facilities that emit greenhouse gases to buy carbon pollution allowances. The credit on your bill is designed to help utility customers during the transition to a low-carbon future.

The California Cap-and-Trade Program is one of many programs resulting from the landmark Global Warming Solutions Act of 2006. Proceeds raised by the Cap-and-Trade Program are used to provide the Climate Credit and fund additional programs that are cutting pollution, creating jobs, and investing in cleaner energy and transportation.

Your Climate Credit is designed to help you join the clean energy transition. For more information about the Climate Credit, visit www.cpuc.ca.gov/climatecredit.

For information about additional programs that are funded by the Cap-and-Trade Program to reduce carbon pollution, improve public health and the environment, and provide meaningful benefits to the most disadvantaged communities, visit <https://www.caclimateinvestments.ca.gov/>.

*Billing periods vary by utility and may not always coincide with a calendar month. If you don't see a Climate Credit in the bill that arrives this month, it will appear in the bill you receive next month. If you are an electric customer, the electric credit will appear as a line item on the electric portion of your bill. If you are a gas customer, the gas credit will appear as a line item on the gas portion of your bill. If you receive both electric and gas service, you will see the electric and gas credits on the respective portions of your utility bill.

The CPUC regulates privately owned electric and natural gas companies and serves the public interest by protecting consumers and ensuring the provision of safe, reliable utility service and infrastructure at reasonable rates, with a commitment to environmental enhancement and a healthy California economy. For more information about our work visit www.cpuc.ca.gov. If you have a question or complaint concerning a privately owned utility, call 1-800-649-7570 or visit <http://www.cpuc.ca.gov/utilitycomplaint>
