Cash rebates may be available for existing single-family detached homes, attached homes (up to four-plex), condominiums and mobile homes. New construction homes do not qualify.

How to Apply

1. Read the Terms and Conditions included in this application package. To find out whether funds are still available, visit us at socalgas.com (search “REBATES”) or call 1-888-431-2226. Funding is limited. This program shall at all times be subject to change or termination without prior notice.

2. Qualifying product(s) must be installed between January 1, 2015 and December 31, 2015 to be eligible for a rebate. Do it yourself, or hire a licensed contractor for the installation of energy-efficient qualifying product(s). Please refer to the ‘Specification Sheet Product Form’ for qualifying product requirements. Qualifying product(s) must be installed prior to submitting a rebate application. THESE PURCHASES AND INSTALL DATES WILL END EARLIER IF FUNDS ARE DEPLETED.

3. Complete the Rebate Application Form and Product Form. Mail the completed forms along with a copy of a recent SoCalGas® bill* and paid receipt(s)/proof of purchase (see Proof of Purchase Requirements - Page 2) to:

SoCalGas
2015 Residential Rebate Program
PO Box 512670
Los Angeles, CA 90051-0670

All submitted applications must be postmarked December 31, 2015, or earlier, to be eligible for a rebate. ALL applications are processed on a first-come, first-served basis, upon receipt, until funds are depleted. INCOMPLETE and INCORRECT APPLICATIONS CANNOT BE PROCESSED. Resubmitted applications are processed on a first-come, first served basis upon the new receipt date.

4. Keep a copy of all mailed forms and required documents (including receipts and Home Improvement Contracts) for your records.

5. Be prepared to participate in any required verification of installation(s). SoCalGas may verify the energy-efficient product(s), customer eligibility and installation prior to payment of rebate.

6. If all program requirements are met, a rebate check is generally mailed within 6-8 weeks, unless your application is selected for verification, which may take additional time.

* Proof of Property Ownership from owner, and a copy of a recent SoCalGas bill from the tenant are required when owner has purchased and installed measure in a rental home. Name and address shown on Proof of Property Ownership must match name and install address listed on the application form, and address shown on SoCalGas bill must match the install address listed on the application form.

Energy Savings Assistance Program and California Alternate Rates for Energy (CARE) Program information:
Before starting your energy-efficiency project, did you know you may qualify for no-cost home improvements through the Energy Savings Assistance Program and/or a 20 percent discount on your monthly energy bills through the CARE program? For more information, visit socalgas.com (search “ASSISTANCE”). Or, call 1-800-331-7593 to learn about Energy Savings Assistance Program services and 1-888-427-2200 for CARE program details.
Proof of Purchase Requirements

While you may install some of the products yourself, some should be installed using a licensed contractor. The proof of purchase and other documentation required to process your rebate application may differ depending on who completes the installation. All products must be installed prior to submitting your completed forms and other required documentation.

The following may be used as Proof of Purchase - Home Improvement Contract (HIC) and/or paid invoice/receipts. The California State License Board (CSLB) requires that licensed contractors provide you with a HIC if the materials and labor total for the product(s) and installation is $500 or more. It is recommended that you request a HIC from your contractor even if the contractor installation was less than $500. If an HIC is your proof of purchase, it must be the original given to you by your contractor and must be signed and dated by both you and your licensed contractor. If the signatures are not dated, the date that the HIC was written will determine the product purchase date.

Proof of Purchase must include at least the following information:

1. Retailer/Contractor name, business address and phone.
2. Itemized description of each product, including such information as:
   a. Manufacturer, product make and model number(s), and other identifying information.
   b. Insulation level (i.e. R-30), square footage.
   c. Energy Factor (EF) for natural gas water heaters.
   d. AFUE for natural gas furnace.
   e. Equipment-only cost
3. Invoice which includes purchase price per product, and notes “Paid in Full” or lists payment terms if applicable.
4. Product installation date, unless self-installed.
5. C.O.D. (cash on delivery) will be accepted as proof of purchase provided C.O.D invoice is accompanied by a delivery receipt, or an install date is noted on the invoice.

Read the Specification Sheet Product Form included in this application (page 4) to make sure your installed product meets the qualification requirements of the program.

For additional information on Home Improvement Contracts or the status of your contractor's license, visit [cslb.ca.gov](http://cslb.ca.gov) or call the Contractors State License Board at 1-800-321-CSLB (2752).

**Guide for Heating Ventilation and Air Conditioning (HVAC) Systems**

**Step 1: Focus on Quality Installation**
How well your heating, ventilation, and air conditioning (HVAC) system performs, and how much it costs to operate, depend in part on the proper installation of the system. Improper HVAC installation may cost more in the long run – using more electricity, running up your bill, and making your HVAC work harder, which can shorten equipment life. Common installation problems such as low air flow, improper charge or duct leakage can reduce the efficiency and capacity of your air conditioner.

**Step 2: Contractor Selection:**
Hiring a licensed contractor who obtains the required building permit and has knowledge of, and complies with, local codes, ordinances and the requirements of the Building Energy-Efficiency Standards (State Administrative Code, Title 24, Part 6 [www.bsc.ca.gov](http://www.bsc.ca.gov) (search “CODES”)) increases the likelihood that your system will be properly installed and will work efficiently, quietly and safely.

Licensed contractors, in general:
- Have been the subject of a background check
- Are regulated by the Contractors State License Board.

Installers who perform contracting work without having a license have avoided these quality assurance requirements and, in addition, may be in violation of the law.

**Step 3: Quality Assurance**
Cities and counties inspect a sample of projects when a construction permit is issued. A building permit, issued by a local authority may be required for HVAC installations and modifications including, but not limited to, the following:
- New HVAC installation
- HVAC change out/remodel/replacement including the air handler, coil, furnace or condenser
- Relocation of an existing HVAC unit
- Removal of an HVAC unit or system
- Adding ducting.

The installation of the equipment may be inspected by a Building Inspector who will perform a quality assurance check that may include ensuring:
- The system is installed to comply with all applicable state, and county or city codes
- The work specified under the permit has been performed properly
- Required compliance documents have been submitted.

<tr>
<td>B. ATTIC INSULATION</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Attic insulation is eligible for an incentive only if 1) the pre-retrofit insulation level is R-11 or less and 2) there is at least a 24 inch clearance between top of ceiling joist and bottom of ridge board. In addition, the final insulation level must be at least R-30 unless a higher level is specified by local jurisdiction. Attic insulation is feasible only when the attic crawl space is adequate. At the highest peak, clearance between the bottom of the roof rafters and the top of the ceiling joists must be at least 24 inches. If sufficient space is not available for R-30, the final retrofit level must be at least R-19. Garages and other non-living areas do not qualify. Your rebate is based on the amount of insulation actually installed.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>C. WALL INSULATION</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Wall insulation is eligible for an incentive as long as existing walls are not currently insulated and are between conditioned living area and unconditioned area. Garages and other non-living areas do not qualify. The installed insulation must achieve a minimum of R-13. If purchasing insulation, remember that your rebate is based on the amount of insulation actually installed.</td>

An on-site verification of the products purchased and installed may be required before the rebate is paid. REBATE TOTAL $_____

Products receiving a SoCalGas rebate at the point-of-sale, as an instant markdown, through a Regional Energy Network or Energy Upgrade California® Home Upgrade, or through a manufacturer/distributor, do not qualify for a mail-in or online rebate.

All clothes washers must be installed with a water heating source using natural gas distributed to the installation address by SoCalGas. The ENERGY STAR label is your assurance of energy-efficiency performance that exceeds federal standards. When used properly, ENERGY STAR-certified products use less energy than standard equipment, they cost less to operate, and create less pollution. For product retailer listings, visit energystar.gov.

Additional rebates from other utilities: Your local electric and water utilities may also offer energy-efficiency rebates. In some cases, they may be combined with rebates from SoCalGas for even greater savings.
