This compressor is
located too close to
an elementary school, boys
& girls club, and homes
thousands of people are
being poisoned for your
profit. Shut it down!

doesn't run in
our family

of all my siblings (8) all but
me have developed health
problems, especially asthma and
other respiratory + developmental
diseases. We all went to EP
Foster. The effects are clearly
related to your unsafe project.
Leave us alone, go to SB
county, which this compressor serves

Expanding a site that
is already in a bad
location next to a
school is a bad
idea

Environmental
responsibility may seem
expensive but the cost
to life could be much
more expensive and
for families first, and
in the long term.

My children attend school
near this site. ~~that~~
We have learned about
potential dangers & emissions.
Request an alternative
location for the compressor -
there are several identified.

Under existing law,
would it be legal to
build a new compressor
next to an elementary
school? Would it
be prudent? I think
not.

As I attend school on the Avenue
near the site proposed, I would
like to suggest one of the
other building sites, such as
Avocado or Devil's Canyon Road,
because I would like to feel
safe at school without worrying
about a gas site with potentially dangerous
modernization.

We need the gas compression station be closed. The air quality in our neighborhood is poor. Please close the station or relocate the families that live around the station.

Please move the methane
compressor away from the
elementary school. It's
not a prudent location for
a station that has a non-
zero explosion risk.
